Education

University of Colorado at Boulder

Boulder, CO

B.A. Computer Science | GPA: 3.7/4.0 | Expected Graduation May 2028

Aug 2024 – Present

Minor in Philosophy

- Chancellor's Achievement Scholarship Recipient
- Alpha Phi Delta Local And National Impact Scholarship
- Coursework: Data Structures & Algorithms, Database Systems, Computer Systems, Discrete Structures, Programming Languages, Cybersecurity

Projects

TextCloaker — AI Text Transformation Platform | Svelte, Firebase, Stripe

- Designed and implemented a novel text-transformation algorithm using targeted zero-width Unicode insertion and homoglyph substitution to disrupt AI-detector parsing while preserving human readability.
- Built and shipped a bootstrapped full-stack SaaS and Chrome extension from scratch, reaching **7,000+ users** and processing **3.3M+ characters** across both platforms.
- Implemented subscription billing, referral flows, REST APIs, rate limiting, and analytics dashboards to track adoption, retention, and conversion using production usage data to drive iteration.

FratDoor — Greek Life Event Management | Svelte, Node.js, Firestore, PayPal APIs

- Built and deployed a platform adopted by **42 fraternities**, replacing manual event workflows with ID/QR check-in, policy enforcement, ticketing, and live analytics.
- Engineered a centralized operations dashboard processing **150,000+ check-ins** across **300+ events**; extracted the offline-tolerant sync logic into offline-sync-engine, a published open-source npm package for reliable mutation queuing over flaky networks.
- Implemented authentication, role-based admin controls, Stripe and PayPal payment flows, notifications, and operational dashboards for chapter and IFC administrators.

WebHeckScanner — Web Vulnerability Scanning Toolkit | Bash, Sqlmap, Nikto, Nuclei

- Built a Bash orchestration tool that chains SQLMap, Nikto, Nuclei, and reconnaissance utilities (Gau, Httpx, WaybackURLs) into a single automated bug-bounty scanning pipeline.
- Open-sourced the tool; adopted by the security community with 240+ GitHub stars and 48 forks.

Professional Experience

The Undergraduate Interfraternity Council at the University of Colorado, Inc.

Boulder, CO

Director of Technology

Dec 2025 – Present

- Own technology strategy for a 22-chapter, 2,500+ member organization, translating operational needs (event safety, access control, member workflows) into shipped software (FratDoor, IFC EventHub).
- Built IFC EventHub, an event-registration system with automated notifications and emergency-contact workflows, now the organization's system of record for event operations.

Leeds Technology Services, University of Colorado Boulder

Boulder, CO

Student IT Support Technician

Jan 2025 – Present

- Resolved **1,000+ faculty support tickets** through ServiceNow and in-person troubleshooting.
- Diagnosed and resolved hardware, software, and network issues for the Leeds School of Business, balancing fast user support with secure and reliable technical resolution.

Skills & Interests

Technical: Svelte, Node.js, Firestore, Google Cloud, SQL, Python, Web Scraping, Bash, AWS, and Linux.

Certificates: Google Cybersecurity Professional & Google Analytics Advanced
